## VIDEO GAME DEVELOPER & PROGRAMMER

PROFILE

I'm a game developer and programmer student who is determined and focused in order to find the best way to fulfill my tasks. Whenever I find anything I don't know, my first instinct is to search about it and understand it, learning its meaning and how to use it in my work.

My goal is to improve my programming skills and create video games that make me feel proud, so I'm searching for a workspace that can help me achieve these goals.
